Creating the future belongs to those who can imagine, design and implement it

Introduction

The forum has been carefully designed to contribute to supporting the path of sustainable development, urban development, reconstruction of Libya, societal development, finance, medium and small industries, deepening industry for export, energy future development, digital infrastructure and administrative reform. This can be achieved by attracting the best global practices in investment and development, developing productive capacities and available technologies, adopting modern production and management methods, working to reduce the harmful effects of production activities on the environment, rational consumption of non-renewable resources, and seeking to support and develop sectors: education and training - health - investment - industry - agriculture - services - Communications and information technology - Trade - Petrochemicals - Renewable energy - Mining - Recycling of waste - Food and medicine - Transport and communications - Infrastructure - Housing - Tourism - and others.

Creating the future belongs to those who can imagine, design and implement it

Libyan International Forum for Investment and Sustainable Development

27 to 31 March 2022

Forum goals:

Clarify the various challenges and obstacles facing Libya in activating the path of sustainable development, and ways to address them.

Drawing a roadmap for the measures needed to achieve sustainable development in all sectors.

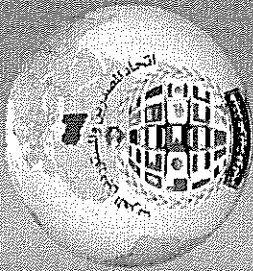

Highlighting the best international practices in the investment and development sectors.

Apply advanced strategies to achieve integration between the investment sector departments.

Strengthening the spirit of social responsibility among all state agencies and citizens, and unifying the view of development efforts as a national, legitimate and ethical trust that requires cooperation and integration among all at the level of the public and private sectors and at the level of community members.

Creating the future belongs to those who can imagine, design and implement it
