# METHODOLOGICAL NOTES AND SOURCE

As from 2020, EURATEX decided to reshape the format, content and frequency of the annual traditional reports, formerly known as the "Bulletins".

The 4 annual issues have been merged into two reports:

- ▶ **The Spring Report**, an analysis of the EU textile & clothing external trade
- ▶ **The Autumn Report**, an economic analysis of the EU textile & clothing industry and short-term prospects

EU Data in this report refers to EU-27 (2022).

"T&C" mentioned in this report refers to products categories which are based on the Combined Nomenclature / Harmonised system: Textiles (HS chapters 50 to 60+63) and clothing (HS chapters 61+62).

Data source: IHS, based on EUROSTAT

Extra EU-27 trade by sub-sector  
Extra EU-27 trade by main partners

# FOREWORD

In 2022, EU trade in textiles and clothing has exceeded, for the first time in history, the €200 billion mark. This confirms once again that “textiles” is one of the most globalised sectors of the European economy, and hence the importance of taking that global dimension into account when designing EU and national policies. Failing to do so may have a devastating effect on the global competitiveness of the European textile industry.

This record growth of total trade is mainly due to a sharp increase of clothing imports (+36,6% in value), especially from China and Bangladesh, which outweighs our export performance. As a result, the EU’s trade deficit in textiles and clothing has increased to €70 billion, which is 48% higher than the year before.

Such a growing deficit is a cause for concern, at least on 3 levels:

- The EU’s Industrial Strategy aims at strengthening our resilience and “strategic autonomy”; at least in the clothing segment, this is not happening. Instead, our dependency has increased, and becomes critical in certain raw materials and fibres.
- The Commission’s ambition is to promote – and prevail – high quality and sustainable textile products. The EU Textile Strategy clearly stated that by 2030, all products placed on the Single Market – regardless where they have been produced - shall comply with a new set of higher standards. With imports continuing to grow and now reaching €140 billion, it is questionable how effective quality control over these imports can be organised.

Market surveillance will need to be stepped up massively, without becoming a barrier to trade.-

- Rather than focus only on imports, we also need to strengthen our efforts on the EU’s export performance, so as to rebalance our trade relations with the rest of the world. EU companies are world leader in high end fashion products and in technical textiles. More needs to be done to support their activities in established markets but also emerging economies. For instance, the ongoing FTA negotiations with India should focus on improving market access and ensure “fair” competition with local companies.

As indicated in this 2022 report, it is essential to differentiate between trade in value and in volume. EU’s export of textile products has increased by 13% in value, but actually dropped by nearly 7% in volume. This obviously reflects the very high inflation figures from last year, caused initially by the rising energy prices and changing central bank policies. This in turn leads to uncertainty with the consumer, resulting in low demand and gloomy prospects for the entire value chain.

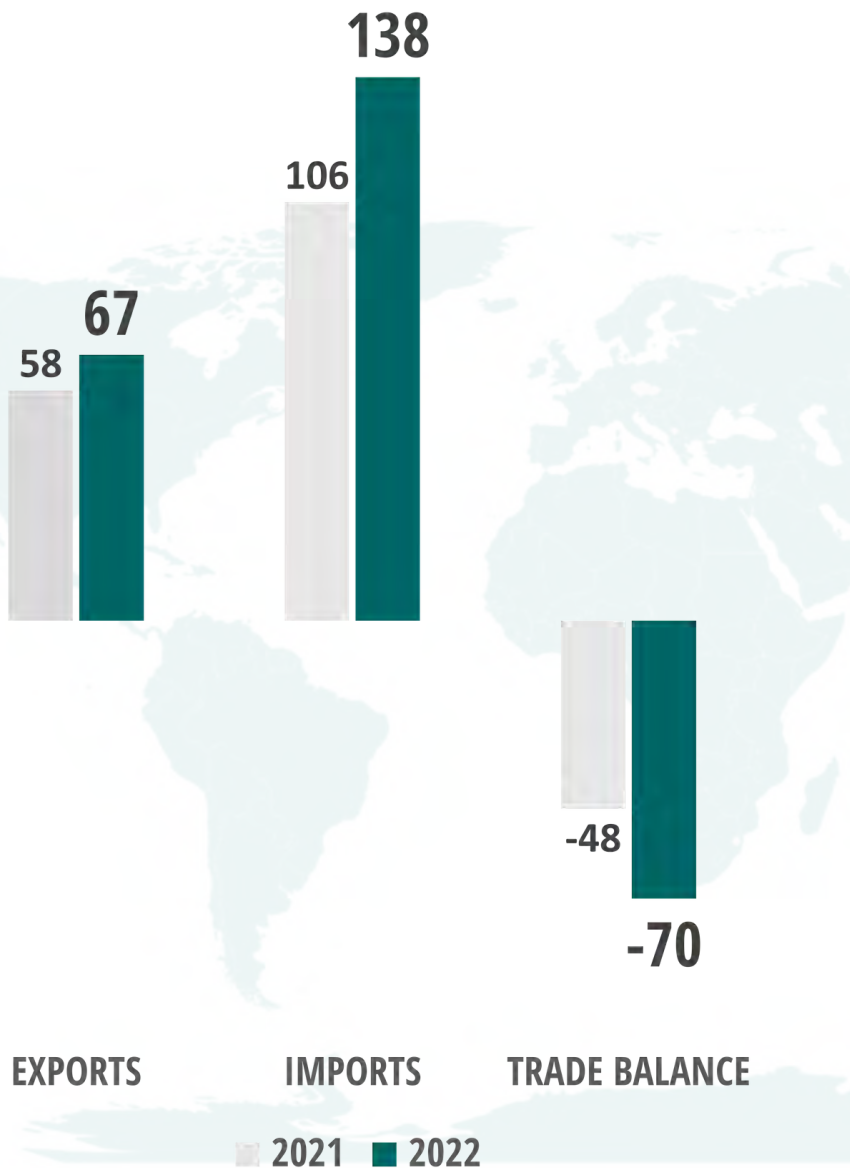

It is essential to restore that consumer confidence, while maintaining the energy prices at a reasonable level and ensure a level playing field for all operators in the textile industry. On that basis, European companies can prosper and offer quality jobs to 1.3 million workers.

Dirk Vantghem  
Director General

# EU TRADE HIGHLIGHTS

## 2022

Units: Billion EUR

Europe is the world second exporter of Textile & Clothing, after China

**+30%**  
surge of EU imports' value due to a rise in clothing from China & Bangladesh

**+15%**  
increase of EU T&C exports' value (-4.5% in volume), resulting mainly from prices' increases

# EU TRADE HIGHLIGHTS

## 2022

Russia's war on Ukraine, which started in February 2022, and the disruptions in trade caused a rapid deterioration of the economic outlook. It adds to pre-existing inflationary pressures by strongly raising energy- and commodity prices, exacerbates imbalances in supply and demand, and weakens the purchasing power of households. According to the WTO, geopolitical tensions, inflation, energy and other commodity prices, and the lingering effects of COVID-19 were the main factors impacting world trade and output in 2022. The value of world merchandise trade rose 12%, inflated in part by high global commodity prices.

Similarly, EU textile and clothing trade, measured by the average of the € value of exports and imports, rose 25% in 2022 to € 102.6 billion. Among the sectors, total trade value in textiles was up 15%, while trade in clothing articles jumped by 31%. Furthermore, import and export unit prices went up in textiles and clothing products by, respectively +24% and +21%.

Since strong price movements tend to distort trade statistics in value terms, it makes sense to also focus on volumes when analysing trade developments. EU trade increase in volumes was much lower (+1.6%, as compared with +25% in value), following reduced demand in textiles from Extra-EU partners. Despite declines in textiles last year, EU trade volumes were still 0.4% higher than in 2019 (the pre-Covid year).

### EU exports and imports trade evolution in 2022, compared to 2021:

	EU Exports		EU Imports	
	Textiles	Clothing	Textiles	Clothing
In € (value)	+13.1%	+17.2%	+15.7%	+36.6%
In tons (volume)	-6.9%	+17.6%	-1.6%	+17.5%

Looking forward, the pace of world trade expansion in 2023 is expected to be sluggish, weighed down by the ongoing war in Ukraine, persistently high inflation, tighter monetary policy and financial uncertainty.

# EXPORTS 2022

TEXTILE AND CLOTHING

# EXPORTS IN 2022

Textile & clothing exports reached €67 Billion in 2022, with textiles representing 43% of total exports and clothing products 57%. Extra-EU exports picked up by +15% in value (€ +9 billion) but went down by 4.5% in volume, resulting in a 21% average prices' increase of exported products in 2022. Under this inflationary environment, the prices of textile and clothing articles increased in all categories with the exception of silk and cotton yarn, as well as in the knitwear segment.

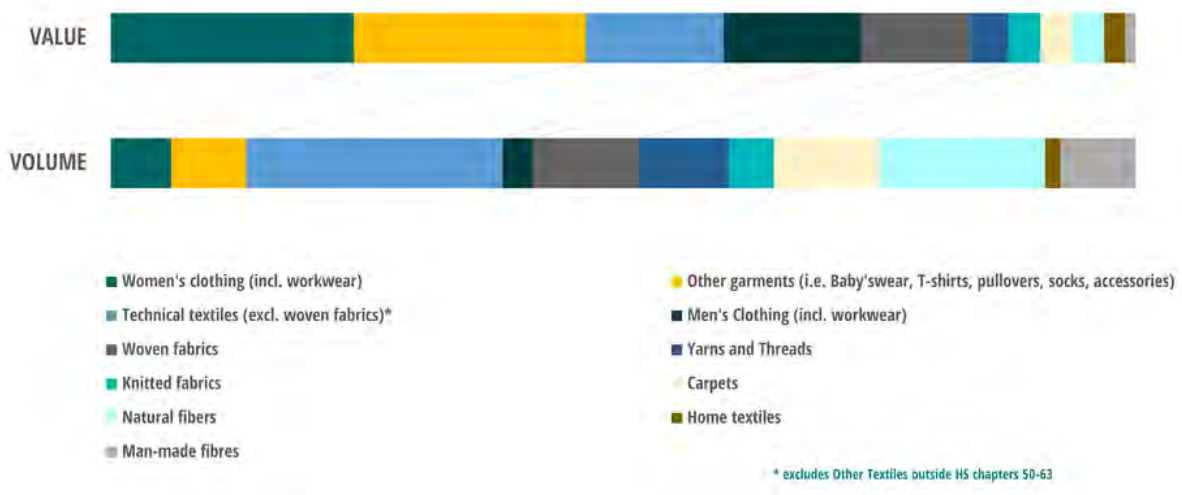

Unless specified, EU refers to EU27  
 Data source: IHS, based on EUROSTAT

TEXTILE AND CLOTHING

# EXPORTS IN 2022

Looking at the product breakdown within the sector, exports' shares showed different trading patterns in value and in volume. Despite representing only 12% of total exports expressed in tonnes, the clothing products accounted for 57% of total values shipped worldwide (48% in 2010), thanks to the very high average price of EU products. European companies maintained their strong market position in high-end products, a trend that was initiated just after the 2008-2009 financial crisis.

Exports by product family, 2022

TEXTILE AND CLOTHING

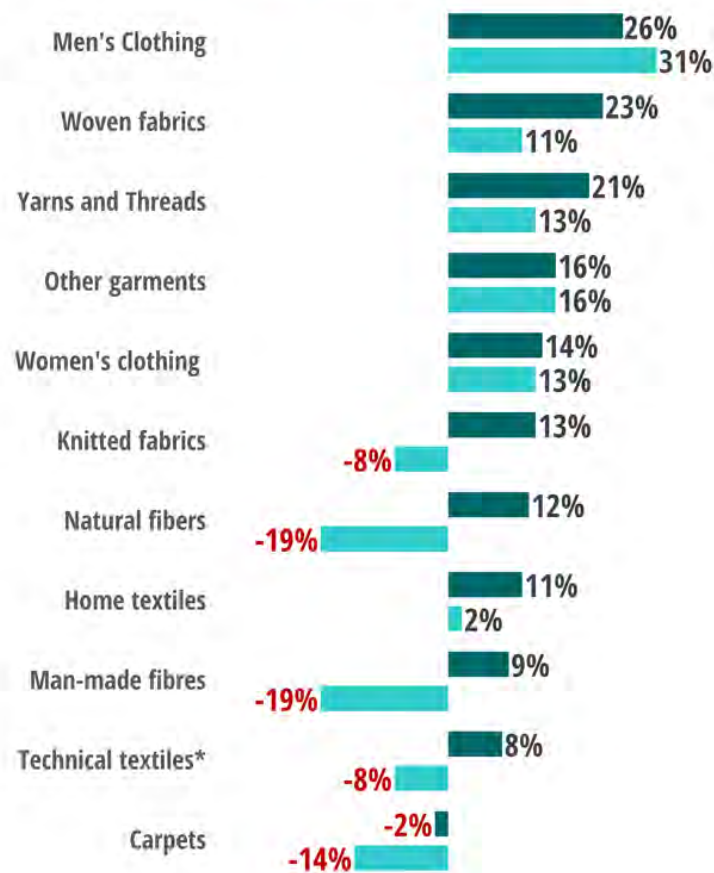

# EXPORTS IN 2022

As shown in the graph below, most segments of the industry were able to increase their export in value, with the exception of carpets. By contrast, data in volume showed bad performances of EU exporters in other sectors, such as knitted fabrics, technical textiles, natural as well as man-made fibers.

## Export growth by product family

TEXTILE AND CLOTHING

# EXPORTS IN 2022

During the year, the good performances of EU exports to third markets, in value, were due to a steep increase in the majority of EU top-10 customers. The exports' jump recorded in the EU top-5 markets represented almost 50% of total gains. On the other side, EU sales of textile & clothing fell sharply to Russia (-35%), following EU sanctions against Russia, applied since the end of Q1 2022.

# TEXTILES EXPORTS

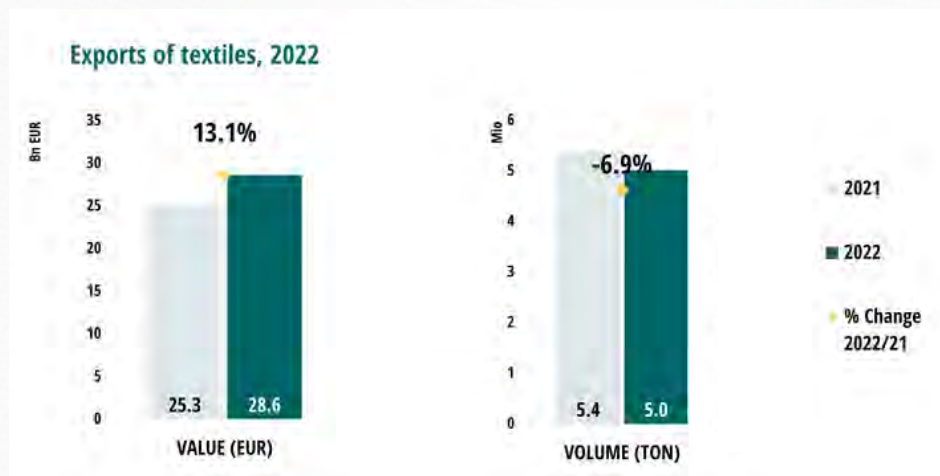

€ 29 billion

Value in 2022

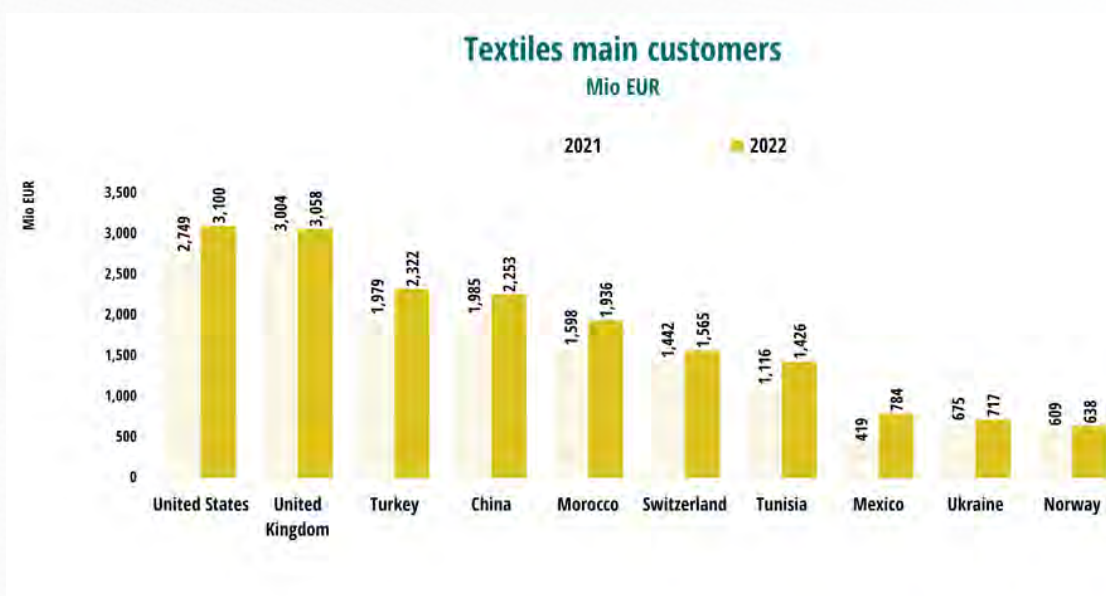

5 Mio Ton

Volume in 2022

EU exports of textiles rose in value but plummeted in volume, reflecting a 21% increase in unit prices. In 2022, exports reached almost €29 billion and 5 million tonnes respectively:

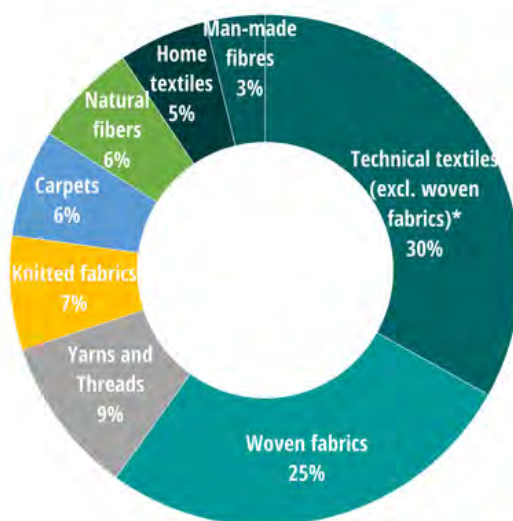

The United Kingdom, the United States and Turkey were the main customers of EU textiles, with a market share of 30% of total exports. Despite a 13.5% increase in value, China is now ranking 4th after Turkey. Textiles' exports went up significantly, following an increase on EU top markets: the United States (+12.8%), the United Kingdom (+1.8%), Turkey (+17.3%), China (+13.5%), Morocco (+21%), Switzerland (+8.5%), Tunisia (+27%), Mexico (+87%), Ukraine (+6.3%) and Norway (+4.7%).

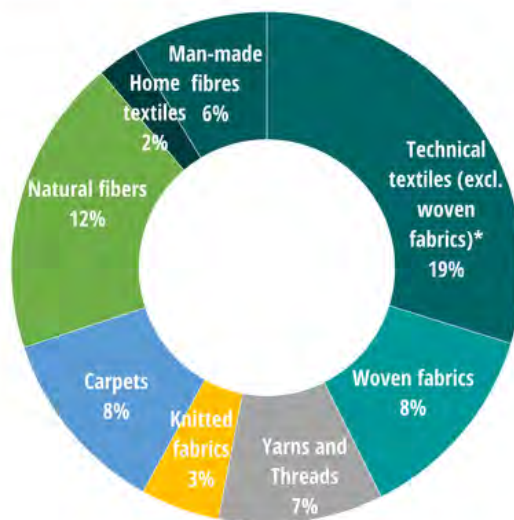

# TEXTILES EXPORTS

Technical textiles were the main exported product from EU-27, reaching 30% of total textiles' exports (€8.7 billion and almost 1 million tonnes). Woven fabrics were the second most important products in terms of value share, representing 25% of total exports (€7 billion).

**% share in total textiles' exports (based on values), 2022**

**% share in total textiles' exports (based on volumes), 2022**

\*exclude other technical textiles from HS Chapters 30, 39, 40, 48, 68, 69, 70 and 96

# CLOTHING EXPORTS

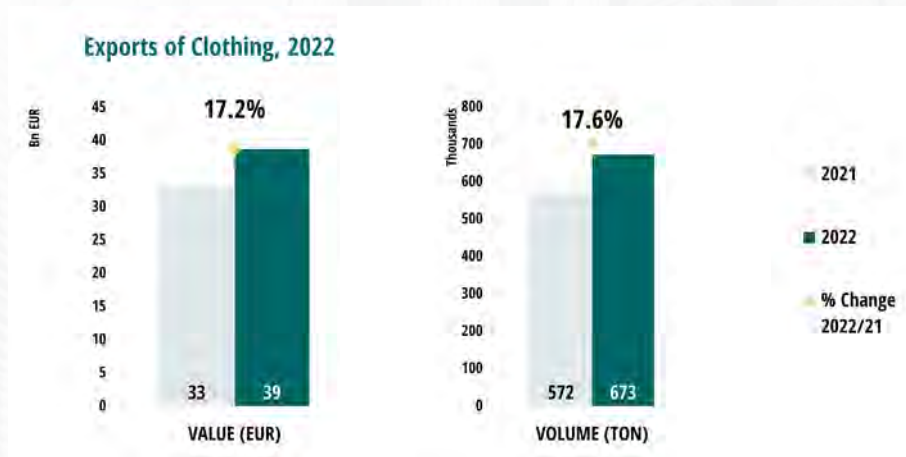

€ 39 billion

Value in 2022

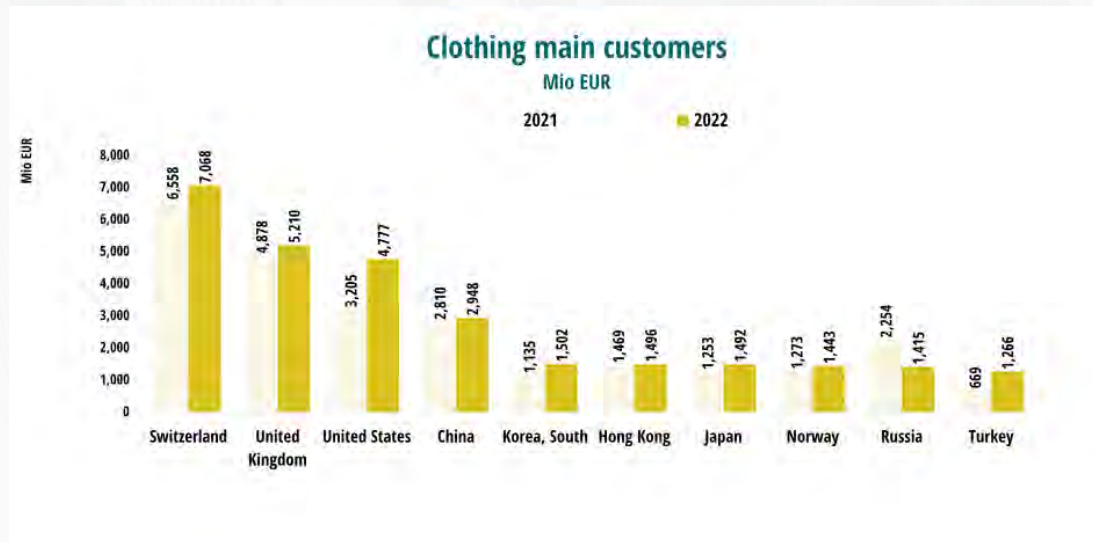

673 K Ton

Volume in 2022

Last year, EU exports to third countries were performing better than retail sales (there was continued feedback from retailers suggesting that consumers are cutting back on spending because of the increased cost of living and prices). As a matter of fact, exports of clothing articles have shown healthy growth over the last year. As displayed in the graph below, clothing exports from EU Member States expanded by 17.2% in value, and 17.6% in volume:

This rise in the 2022 exports was attributable to the positive evolution in most EU's top customers: Switzerland (+7.8%), the United Kingdom (+6.8%), the United States (+49%), China (+4.9%), South Korea (+32%), Hong Kong (+1.9%), Japan (+19%), Norway (+13%), and Turkey (+89%). With a -37% plunge in value and -51% in volume, Russia became the 9th export market for European apparel (from 5th the previous year); this market has been largely impacted by the war and EU sanctions covering i.e. luxury items above €300. The United States' market share increased by more than 55% between 2020 and 2022, going from approximately 8 to 12%. The EU top-3 customers (the UK, Switzerland and the US) still accounted for 44% of the total EU-27 customers in 2022.

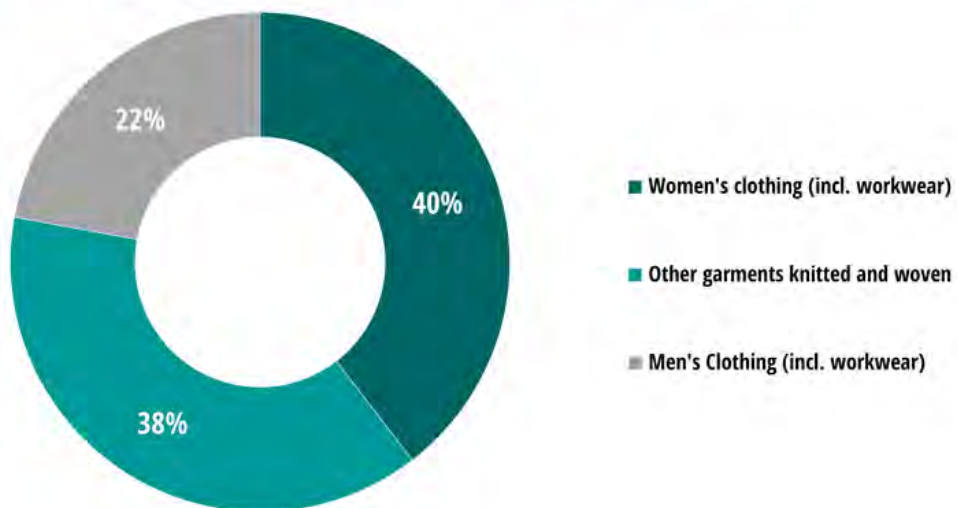

Unless specified, EU refers to EU27  
Data source: IHS, based on EUROSTAT

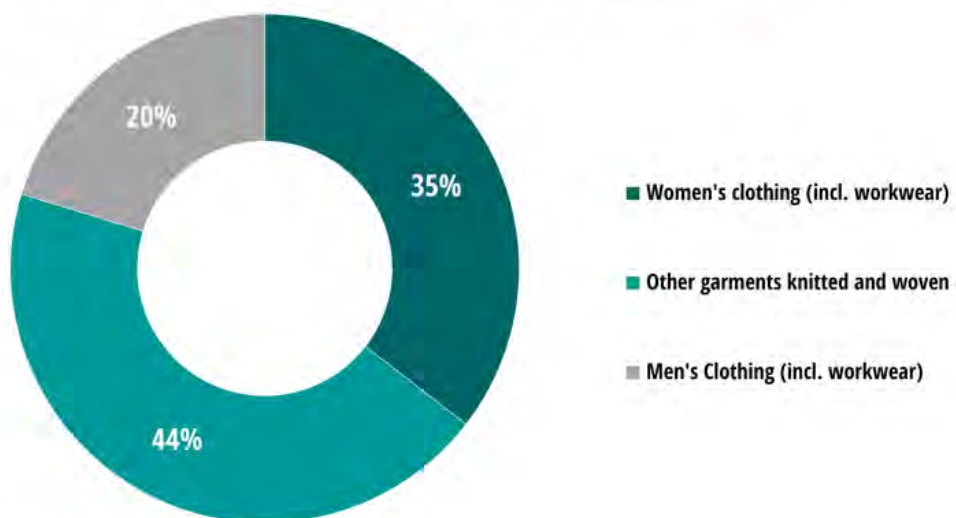

# CLOTHING EXPORTS

With an export market share of respectively 40% and 38% (in value), women's clothing as well as other garments (including babies' garment, T-shirts, hosiery and clothing accessories) were the main product classes exported by the EU. This represents a moderate decrease in value (-1 percentage points) and in volume (-2 points), while men's and other garments' market shares increased as compared with 2021.

**% share in total clothing's exports (based on values), 2022**

**% share in total clothing's exports (based on volumes), 2022**

# IMPORTS 2022

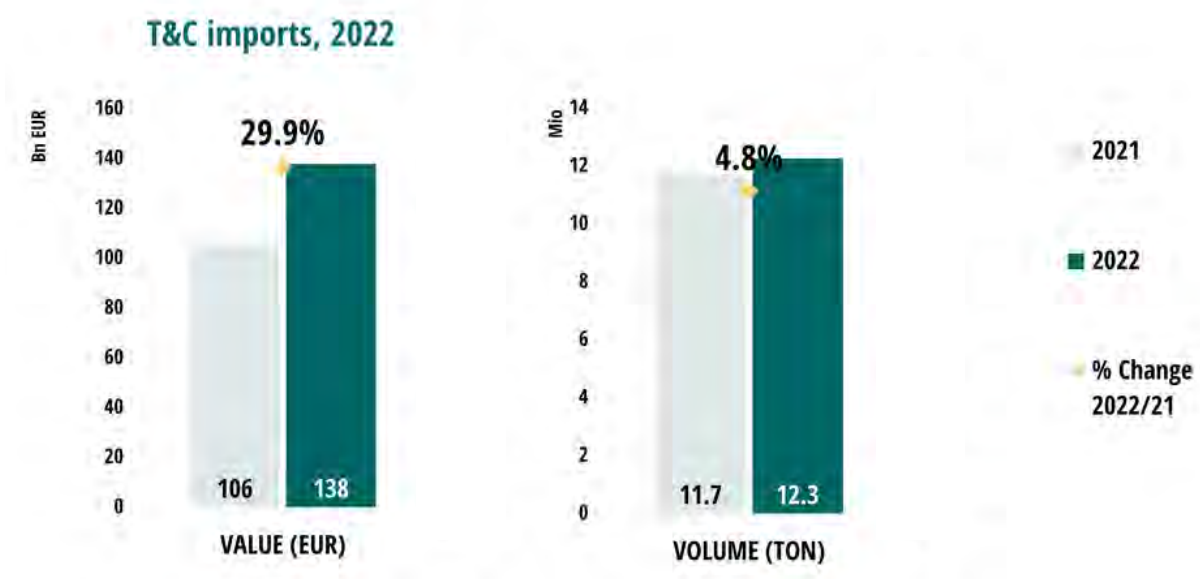

TEXTILE AND CLOTHING

# IMPORTS IN 2022

In 2022, the EU-27 imports jumped by 30% in value (€ +31.8 billion as compared with the previous year) and expanded by a little less than 5% in volume, translating into a 24% increase in the import unit prices as compared with 2021. This noticeable increase was driven by a surge in imports from China and Bangladesh. Last year, the EU was sourcing more than half of clothing articles from these two countries.

The T&C imports' shares in value and volume diverge:

- ▶ Textile products represented only 28% of total imports in value, against 62% in volume;
- ▶ while clothing accounted for 72% of total imports in value, against 38% in volume.

Unless specified, EU refers to EU27  
 Data source: IHS, based on EUROSTAT

TEXTILE AND CLOTHING

# IMPORTS IN 2022

Similarly, imports' shares showed different patterns in value and in volume when looking at the more specific product breakdown. Women's clothing (26% in value | 12% in volume) and other garments knitted and woven (28% in value | 16% in volume) represented the main segments, both in value and volume, while other main segments were men's clothing (18% in value | 9% in volume) and technical textiles (8% in value | 16% in volume):

Imports by product family, 2022

- Other garments (i.e. Baby'swear, T-shirts, pullovers, socks, accessories)
- Men's Clothing (incl. workwear)
- Home textiles
- Yarns and Threads
- Carpets
- Man-made fibres
- Women's clothing (incl. workwear)
- Technical textiles (excl. woven fabrics)\*
- Woven fabrics
- Natural fibers
- Knitted fabrics

\* excludes Other Textiles outside HS chapters 50-63

TEXTILE AND CLOTHING

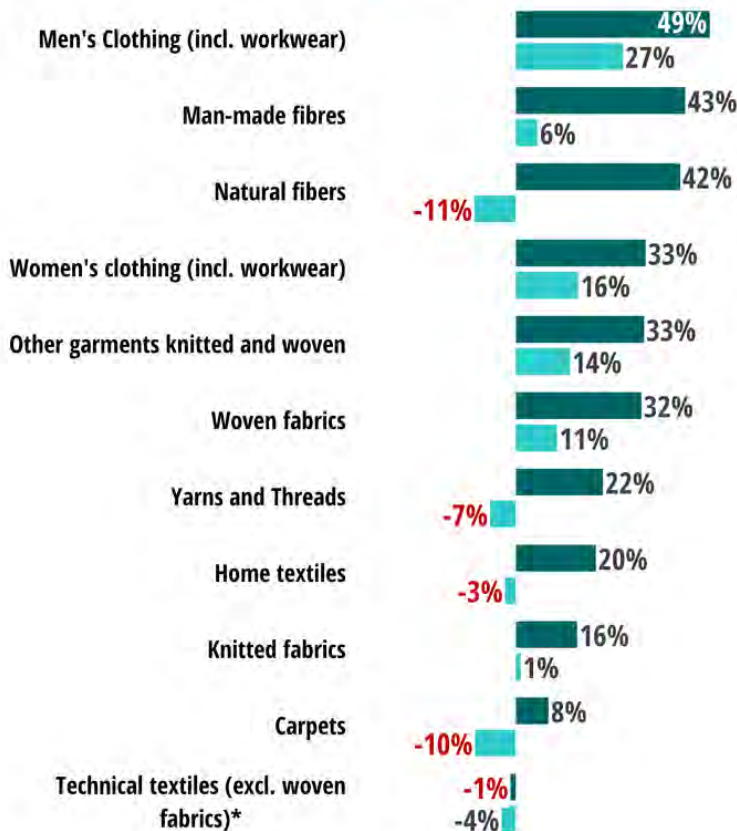

# IMPORTS IN 2022

Men's clothing recorded the sharpest growth in value among textile and clothing imported products in 2022 (almost +50%), followed by man-made fibres, natural fibers, women's clothing, other garments and woven fabrics (between +32% and +43%). Similarly, yarns and threads, home textiles, knitted fabrics and carpets recorded strong rises during the year. By contrast, imports of technical textiles registered a decline in value and volume. This downward trend was mostly due to an adjustment which started in 2021, after the surge in import of personal protective equipment needed during the peak of the coronavirus crisis in Europe.

## Imports' growth by product family

% Change 2022/21

■ VALUE ■ VOLUME

\*exclude other technical textiles from HS Chapters 30, 39, 40, 48, 68, 69, 70 and 96

TEXTILE AND CLOTHING

# IMPORTS IN 2022

Imports from most EU top suppliers recorded positive trends in value. Imports from EU top supplier, China, surged by 23%, corresponding to +€8 billion. Furthermore, imports from Bangladesh jumped by 52% over the period under review. As a consequence, almost half of textiles & clothing imported by the EU were coming from these two supplier countries. By contrast, textile and clothing imports from the United Kingdom continued to fall since Brexit, recording another decrease in 2022 (-10%, equal to €-321 million).

Unless specified, EU refers to EU27  
Data source: IHS, based on EUROSTAT

# TEXTILES IMPORTS

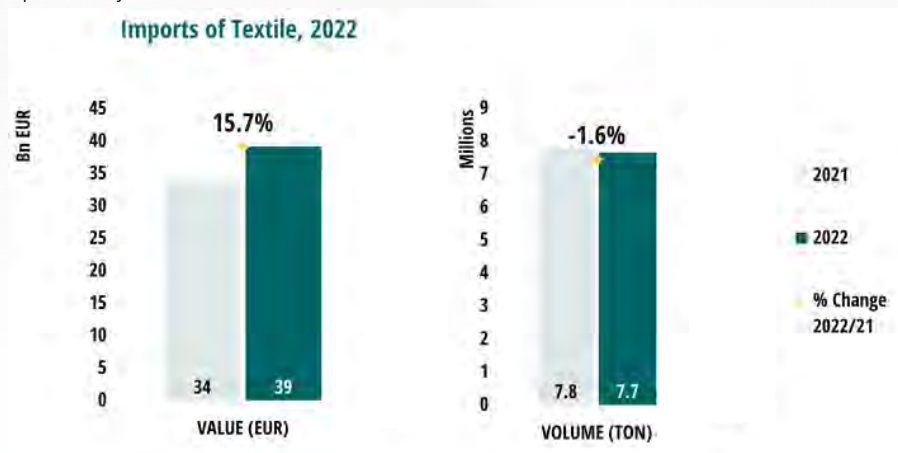

€ 39 billion

Value in 2022

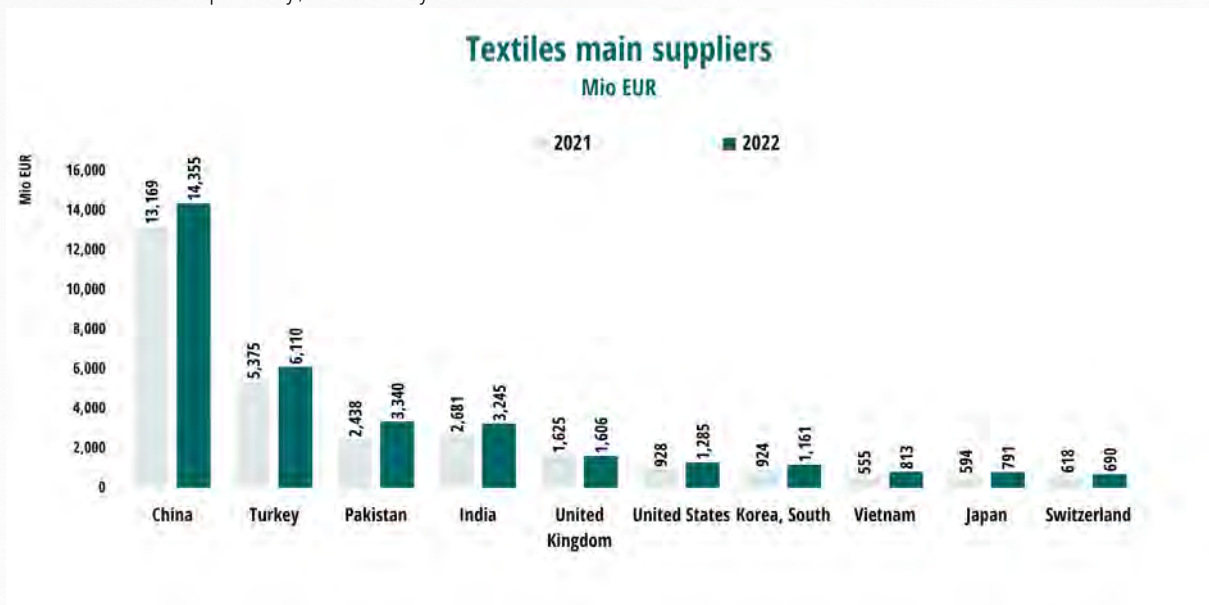

8 Mio Ton

Volume in 2022

Textile imports from Extra-EU countries climbed by +15.7% in value, but slipped back in volume by -1.6% (compared to 2021), achieving €39 billion and 8 million tons respectively:

Textile imports showed an upward trend in value across most EU-top partners: China, the EU first supplier with a market share of 37%, recorded a 9% increase in 2022 (after declining by -53% the previous year, following an adjustment after the boom in made-up textiles, resulting from the pandemic needs). Similarly, imports from other main suppliers rose sharply: Turkey (+13.7%), Pakistan (+37%), India (+21%), the United States (+38.5%), South Korea (+25.6%), Vietnam (+46.5%), Japan (+33.2%) and Switzerland (+11.7%). On the other side, EU imports from the United Kingdom went further down, as a result of Britain’s exit from the EU. According to S&P Global, “increased red tape in UK-EU trade had damaged the competitiveness of smaller British manufacturers especially, since they have fewer resources to deal with it”.

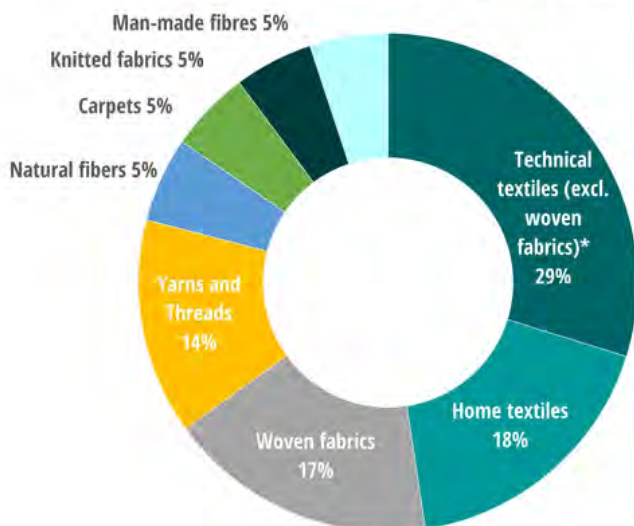

Unless specified, EU refers to EU27  
Data source: IHS, based on EUROSTAT

# TEXTILES

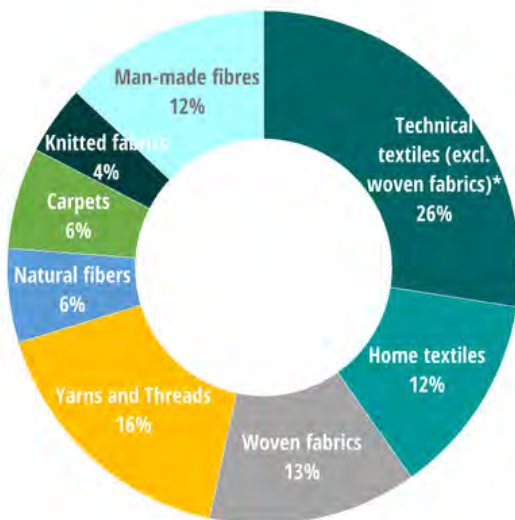

# IMPORTS

Despite a 1.4% reduction, technical textiles was still the main product category imported by the EU27, with €11.5 billion bought in 2022. This segment represented 29% in value of total textiles' imports, against 35% in 2021 and 61% in 2020. Woven fabrics and home textiles' imports accounted for a less sizeable share of total imports (amounting to respectively €6.7 and €6.9 billion), followed by yarns and threads (€5.4 billion):

**% share in total textiles' imports (based on values), 2022**

**% share in total textiles' imports (based on volumes), 2022**

\*exclude other technical textiles from HS Chapters 30, 39, 40, 48, 68, 69, 70 and 96

# CLOTHING IMPORTS

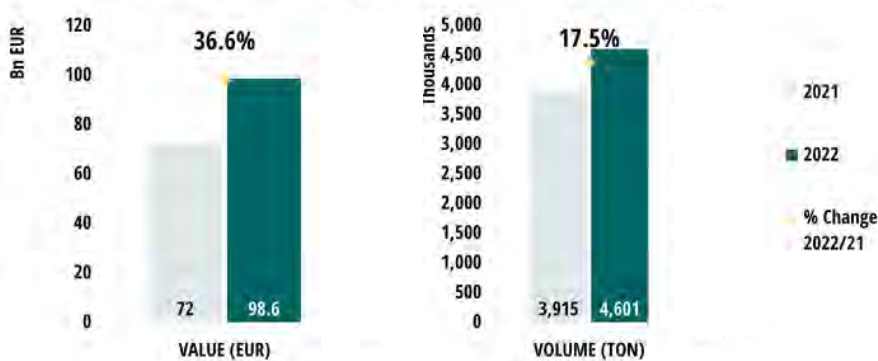

With another sharp increase in value in 2022, clothing imports were substantial in terms of total trade flows, reaching a new record high with almost €100 billion sourced from third countries. Similarly, EU imports registered a significant increase in volumes, reaching 4,600 k tons. As a result, the clothing market share in total T&C imports reached 72% in value (from 68% the previous year) and 38% in volume (from 33%).

**€ 99 billion**  
Value in 2022

---

**4.6 Mio Ton**  
Volume in 2022

Imports of Clothing, 2022

Bangladesh’s market share is increasing by an average of 1% point annually since 2008, from approximately 7% to 22 % today. This supplier achieved an all-time high in the value of its exports to the EU, reaching almost €22 billion in 2022, which represents an increase of 53% compared to 2021. China, Bangladesh and Turkey represented almost 63% of EU27 clothing’ imports in 2022. Due to their large market share, the EU import growth from these 3 suppliers (+37% on average) translated into a €+16.7 billion increase in clothing articles. Similarly, imports from other EU top suppliers expanded significantly over the period: India (+36.3%), Vietnam (+54.2%), Pakistan (+44.4%), Cambodia (+54.2%), Myanmar (+86.5%), Morocco (+20.2%) and Tunisia (+24.6%).

# CLOTHING

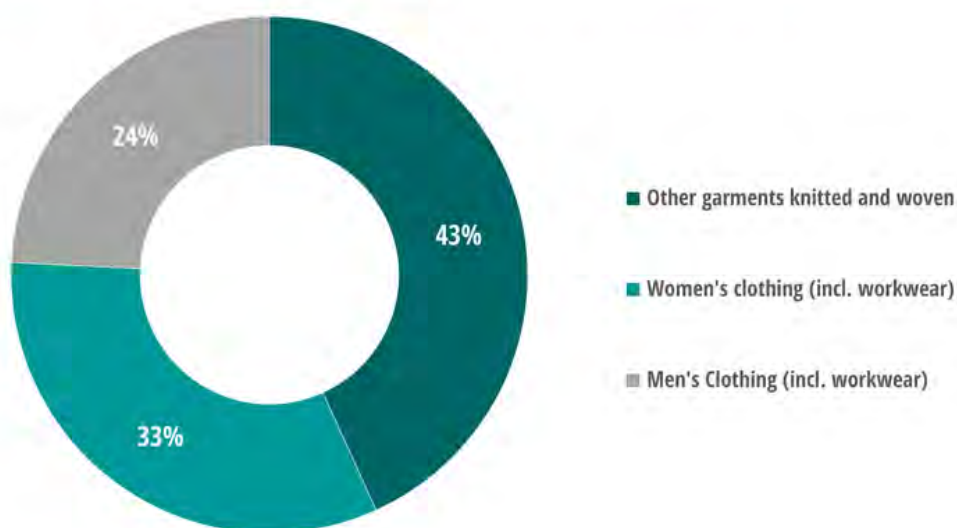

## IMPORTS

With an import market share of 40% in value and 43% in volume, “other garments” (including babies’ garment, T-shirts, pullovers, special garments, hosiery and clothing accessories) was the main product category imported by the EU. This was mainly due to a substantial amount of EU imports of t-shirts, jerseys, pullovers and cardigans, which accounted for 24% of total clothing imports. Today, more than half of these articles are sourced in China and Bangladesh. Women's clothing was also an important class, representing a market share of 36% of EU27 clothing imports in value.

**% share in total clothing' imports (based on volumes), 2022**

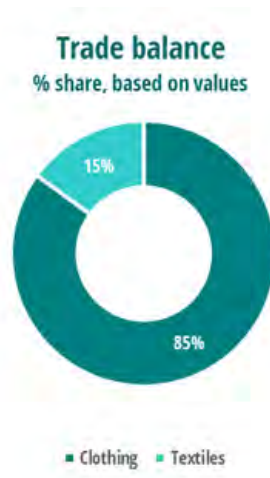

# TRADE BALANCE 2022

TEXTILE AND CLOTHING

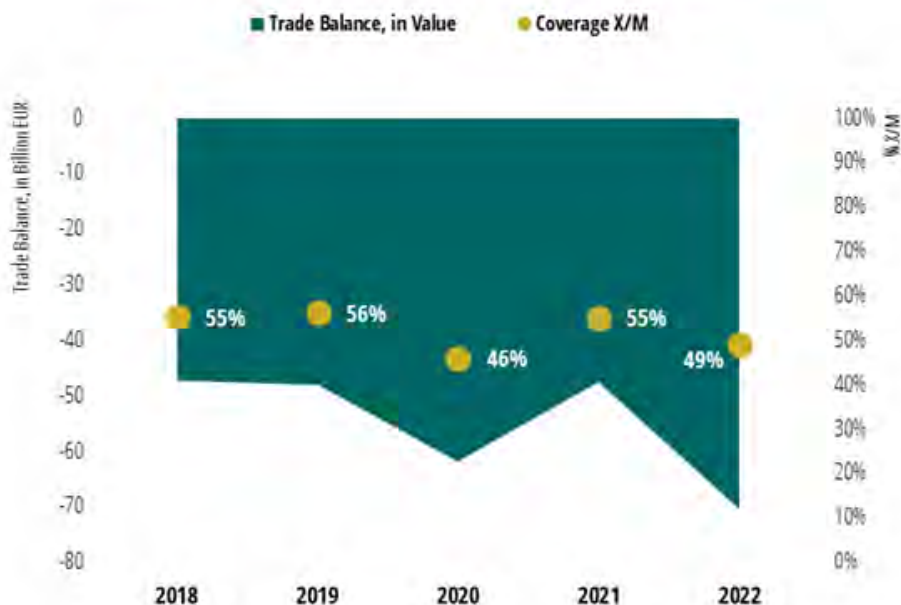

# TRADE BALANCE IN 2022

The European Union's trade deficit reached -70 billion EUR in 2022 (from -48 billion the previous year), a strong deterioration resulting from a sharp increase of clothing imports from China and Bangladesh. As a consequence, the share of clothing in the EU deficit has increased from 82% to 85%. The textile sector accounted for only 15% of the total trade deficit (against 18% the previous year).

At the same time, the export coverage ratio (export over import) deteriorated, falling from 55% in 2021 to 49% last year.

Trade Balance in T&C industry, between 2018 and 2022

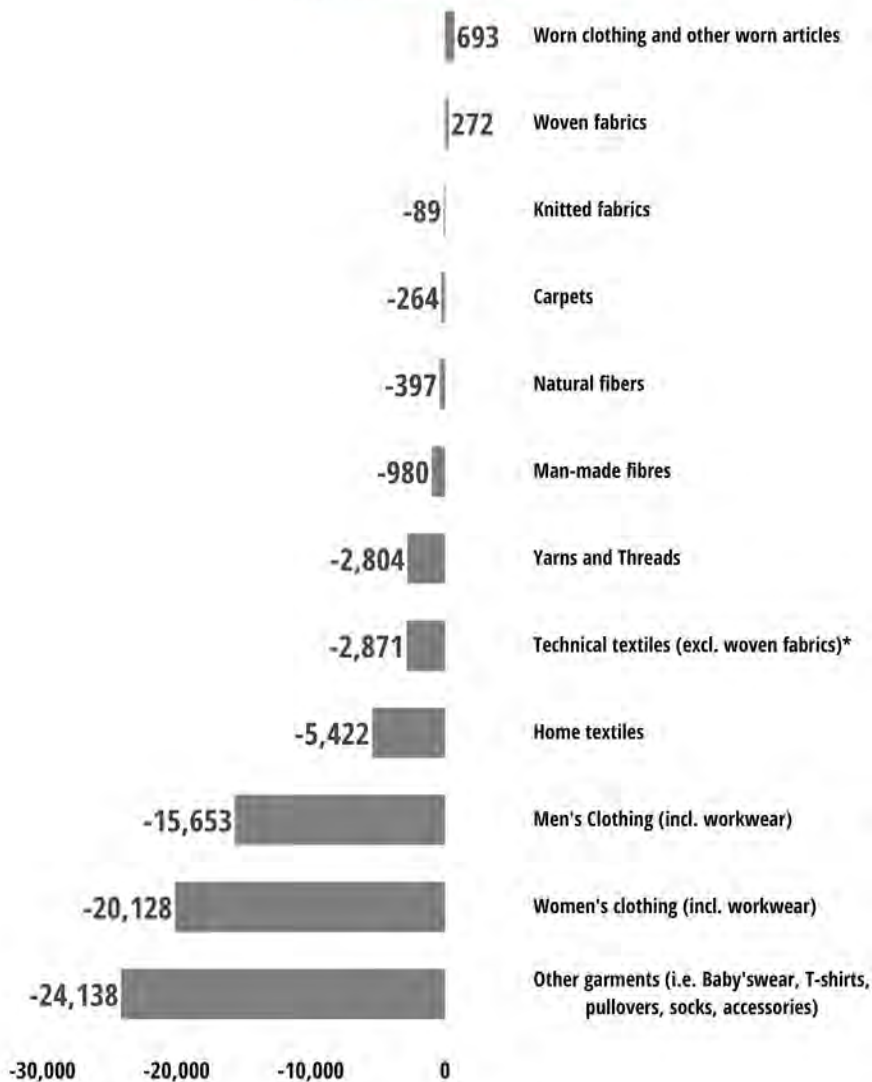

Unless specified, EU refers to EU27  
Data source: IHS, based on EUROSTAT

TEXTILE AND CLOTHING

# TRADE BALANCE IN 2022

In 2022, the EU had a negative trade balance in value with almost all T&C sub-sectors, with the exception of woven fabrics and worn articles.

TEXTILE AND CLOTHING

# TRADE BALANCE IN 2022

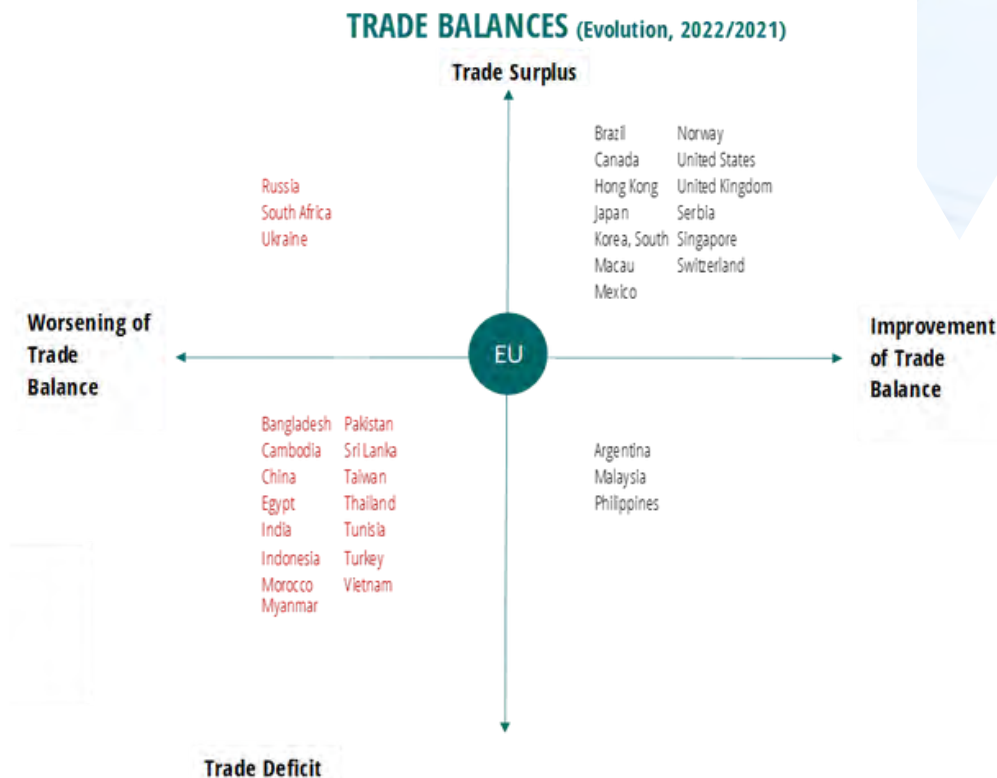

Taking a regional perspective, among the main **Euromed countries**, the EU trade surplus continued to improve with Switzerland (+6%) and Norway (+7%). By contrast, the EU trade balance deteriorated with some key Mediterranean clothing suppliers: Egypt (-91%), Morocco (-18%) and Turkey (-17%).

The EU trade surplus increased markedly with some **South American countries**, such as Mexico (+78%) and Brazil (+43%).

Among the main **Asian countries**, the EU trade deficit deteriorated considerably with Myanmar (+87%), Vietnam (+56%), Cambodia (+54%), Bangladesh (+53%), Pakistan (+41%), Indonesia (+38%), India (+30%), Sri Lanka (+30%), China (+26%), Thailand (+24%) and Taiwan (+16%). On the other side, trade evolutions have resulted in an improvement of the trade surplus with Singapore (+76%), South Korea (+37%), Japan (+8%), Macau (+7%) and Hong Kong (+2%); as well as in a reduction of EU trade deficit with Malaysia (-35%) and Philippines (-34%).

EU performances with other major trading partners delivered positive trends, with trade surplus improvements with the United States (+32%), the United Kingdom (+15%) and Canada (+40%); as well as a deterioration of the trade balance with Russia (-37%), Ukraine (-11%) and South Africa (-5%).

The graph summarises these trends in the balance of trade in textiles & clothing by EU-27 trade partners (2022/2021 variations based on values):

# EVOLUTION OF EXTRA & INTRA-EU SHARES IN EU TRADE

TEXTILE AND CLOTHING

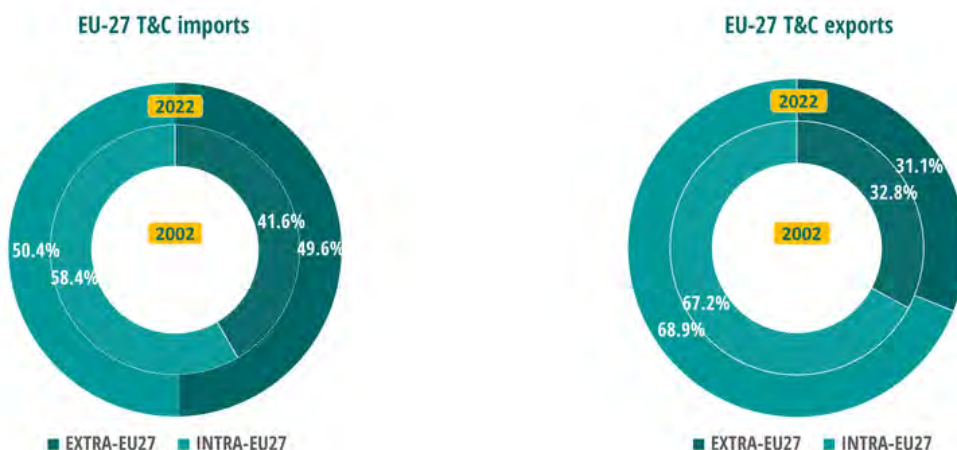

# EXTRA & INTRA-EU TRADE

## Evolution of the EU Trade Patterns

Since the beginning of the century, we can notice a change in the EU trade patterns regarding the **distribution between the intra and extra-EU trade**. Indeed, the EU Member States are more and more looking for suppliers outside the EU and, in particular from low cost Asian countries. This reflects the globalisation of the economy and the delocalisation process outside Europe.

The effects of the financial crisis in 2008 slowed-down the relocation process and fostered a redirection of trade with nearby countries to benefit from different assets such as service, flexibility and fast deliveries. Between 2010 and 2019, the distribution between the intra and extra-EU imports was relatively balanced. This equilibrium in the EU trade patterns was disrupted by the Covid-19 crisis. Indeed, the intra-EU share in T&C imports recorded its lowest value in 2020 (48%), while the extra-EU share reached a record-high (52%), boosted by the demand of several key products including nonwovens and face masks.

Despite the increasing pressure from cost-competitive Asian suppliers, intra-EU imports in 2022 still account for a large share of total imports. As of today, half of our imported T&C goods originate from within the EU, whereas nearly 70% of companies' "exports" are to another member state. These figures confirm the strategic importance of maintaining a well-functioning EU Single Market, where textile companies can "trade" smoothly between member states, building up competitive European supply chains.

Unless specified, EU refers to EU27  
 Data source: IHS, based on EUROSTAT

TEXTILE AND CLOTHING

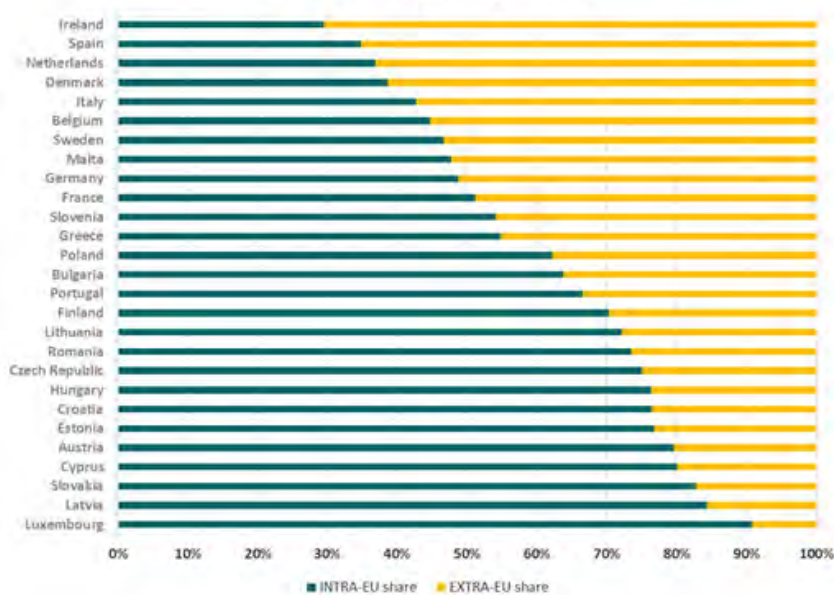

# EXTRA & INTRA-EU TRADE

Imports from other EU countries, as a share of total trade in textile & clothing, ranged from just over 29 % for Ireland to 91 % for Luxembourg in 2022. France’s main trading region for the exchange of T&C continued to be Europe, which accounted for 51% of France imports. By contrast, Italy, Spain and Germany were mainly trading with international markets.

On the export side, the share of intra-EU exports increased by 7 percentage points from 2015, denoting a rising demand from the EU internal market over the last years. Exports to other EU countries, as a share of total trade in textile & clothing, ranged from just over 27 % for Ireland to 88 % for the Czech Republic in 2022. German and Dutch exports to the EU-27 amounted to respectively 72% and 82% of their total trade. In Italy, exports are evenly spread across EU and non-EU countries (50%/50%)

## Methodological note

The main country groupings included in this section are:

- \* **EFTA & UK:** Iceland, Liechtenstein, Norway, Switzerland & United Kingdom
- \* **NAFTA:** USA, Canada, Mexico
- \* **SOUTHERN NEIGHBOURHOOD:** Algeria, Egypt, Israel, Jordan, Libya, Morocco, Syria, Tunisia, Palestine Territories, Turkey
- \* **EASTERN NEIGHBOURHOOD:** Armenia, Azerbaijan, Georgia, Belarus, Moldova, Ukraine, Russia
- \* **SOUTH EAST EUROPE:** Albania, Bosnia & Herzegovina, Kosovo, Macedonia, Montenegro, Serbia
- \* **MERCOSUR :** Argentina, Brazil, Paraguay, Uruguay
- \* **SAARC:** Afghanistan, Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka
- \* **ASEAN:** Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, Philippines, Singapore, Thailand, Vietnam
- \* **EAST ASIA:** Japan, South Korea, Taiwan, China
- \* **ACP:** Africa, Caribbean and Pacific countries
- \* **OTHER:** Rest of the world

**BOX1:** Ukraine, the EU trade with Ukraine

**BOX2:** "Pan-Euromed":

- the EFTA States (Switzerland, Norway, Iceland and Liechtenstein),
- the Faroe Islands,
- the participants in the Barcelona Process (Algeria, Egypt, Israel, Jordan, Lebanon, Morocco, Palestine territories, Syria, Tunisia and Turkey),
- the participants in the EU's Stabilisation and Association Process (Albania, Bosnia and Herzegovina, the Republic of North Macedonia, Montenegro, Serbia and Kosovo),
- the Republic of Moldova, Georgia and Ukraine.

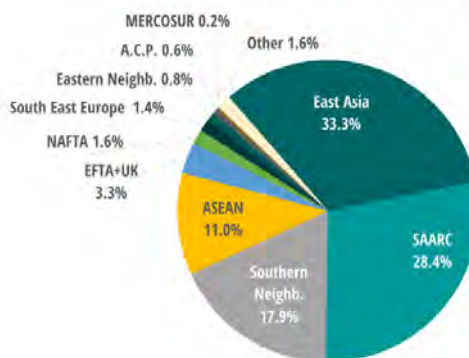

**BOX3:** BREXIT, the EU trade with UK

TEXTILE AND CLOTHING

# SHARE OF REGIONS IN IMPORTS

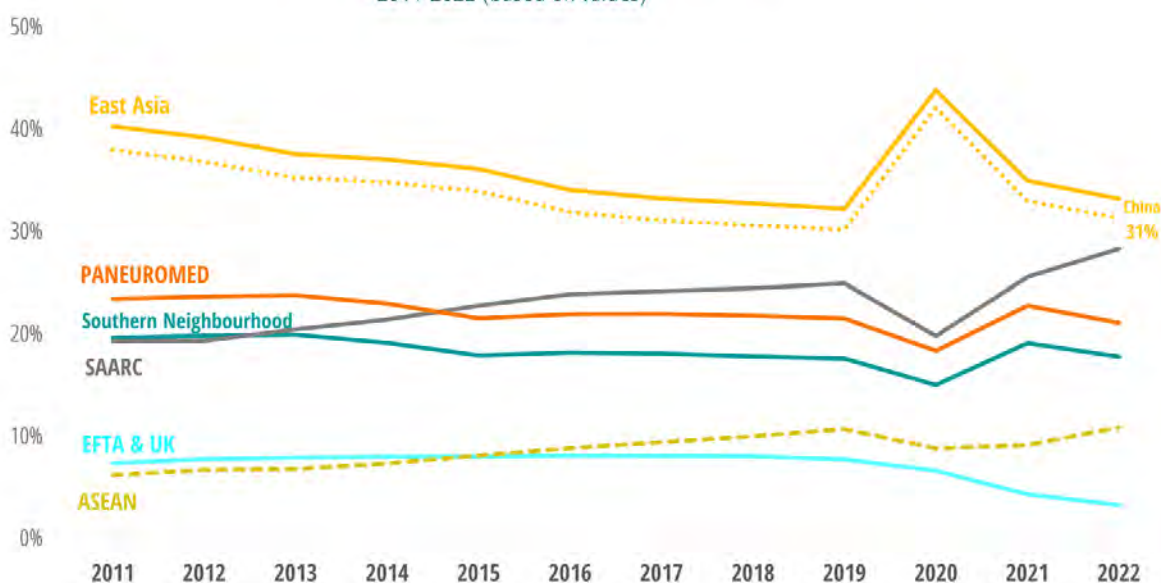

Even though China remained the main EU supplier with a total of €43.2 billion, down by -23% from the previous year, this supplier has seen its market share diminishing steadily year after year, reaching 31% of textile and clothing shipped to the EU in 2022. 2020 was an exception to that trend, as the market share of China jumped to a 42% record, boosted by the demand for face masks and personal protective equipment (PPE) in the wake of the Covid-19 pandemic. This constant erosion is mainly due to suppliers' diversification.

Share of regions in total EU imports, 2022

Evolution of region's share in EU imports

Data source: IHS, based on EUROSTAT

## TEXTILE AND CLOTHING

# SHARE OF REGIONS IN IMPORTS

With China representing today 94% of imports from East Asia, we can notice similar trade patterns for that region: the leading role of **East Asia** in extra-EU imports declined rapidly from a 44% record in 2020, following the Covid-19 outbreak, to 33% in 2022 (a share that remains higher than before the pandemic).

Contrasting with East Asia pattern, the **SAARC** zone has grown steadily since 2001, doubling its share in the EU's textile & clothing imports from 14% in 2001 to 28% in 2022. This impressive growth is mainly due to the performance of Bangladesh, which controls today 16% of total EU imports (against 4% in 2001). Companies in the **ASEAN** area were quite dynamic, allowing them to control a growing EU import market share over the years. The share went up from 9% in 2021 to 11% the following year.

Among the other main supplying zones, the **Southern Neighbourhood** countries, which have long benefited from their proximity to the EU-27 markets, have considerably weakened their position since 2003, with an EU import's share shrinking from 27% to 15% in 2020. However, the market share jumped to 18% in the following years, following increased supplier diversity initiatives from buyers and nearshoring.

These four zones accounted for 90% of total extra-EU textiles and clothing imports in 2022, against 71% the previous year.

## Box 1 : Ukraine

**Textiles and Apparel is an important sector of the Ukrainian economy.** Around 2.500 companies employ over 100.000 workers across different segments of the industry. 40% of their production is exported, with European being the most important destination.

In 2022, total T&C trade between EU and Ukraine reached €1.6 bn. Ukraine was the 23rd supplier of the EU and its 15th customer. The main traded products include clothing articles and made-up textiles.

**The Accession Agreement and its Deep and Comprehensive Free Trade Area** has been in force for more than 6 years now. The agreement facilitates trade by making customs procedures more efficient and by gradual approximation of Ukrainian legislation, rules and procedures, including standards, to those of the EU.

**The Russian invasion has a devastating impact** on the Ukrainian economy, but many textile companies continue their production, i.e. in supplying military fabrics. The proposed cutting of duties by the EU and the inclusion of Ukraine in the PEM Convention (on rules of origin) should give further support to its industry.

EURATEX has launched the EU-Ukraine Textile Initiative in cooperation with Ukrlegprom, to promote cooperation between both sides.

TEXTILE AND CLOTHING

# SHARE OF REGIONS IN EXPORTS

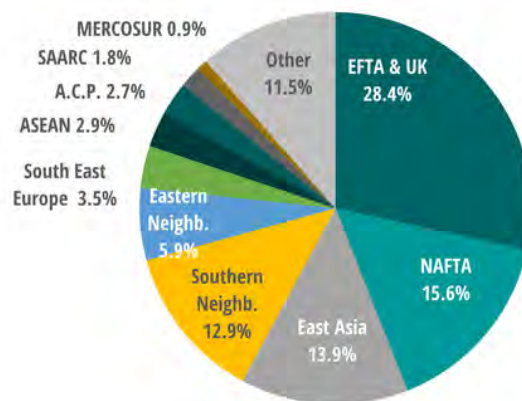

The EU-27 exports of textile and clothing, characterised by high value-added products, are a major driver for the sound development of the companies' turnover on a yearly basis. Even though average prices are above world levels, EU companies are supplying their products across the world, thus reducing their geographical risk.

Other European countries and neighbourhood regions are the largest trading partners of the EU-27. As a matter of fact, the top-four main country groupings (EFTA & UK, Eastern & Southern Neighbourhood as well as South-East Europe) accounted for 51% of total EU exports in 2022. In spite of its modest size, EFTA as well as UK accounted for 28% of total EU exports with more than € 19 billion sold to these markets last year. With a respective share of 13% and 6%, the Southern and Eastern Neighbourhood was also playing an important role for EU companies.

Among Asian regions, European exporters performed relatively well in East Asia, including China (14% market share). With a share of almost 16%, the NAFTA region was the second largest partner of the European Union.

Finally, the other destination markets (Mercosur, ASEAN, SAARC and ACP) accounted for 8% of total EU exports in 2022.

Share of regions in total EU exports, 2022

**Box 1 : Pan-Euromed**

The Pan-Euromed, covering the EU's neighbourhood region\*, is an important region for the EU-27, as trade with these countries accounted for €677 billion. For the EU textile and clothing sector, the region represented 35% of its exports in 2022, against 32% 10 years ago. Last year exports rose significantly (+15%), reaching more than € 23 billion.

As of 1 September 2021, the new rules became applicable. They seek to modernise and update the rules of origin contained in the EU's preferential trade agreements with countries in the Pan-Euro-Mediterranean (PEM) region, by making them more flexible and user-friendly. The aim of this is to promote economic integration and facilitate trade in the area.

\* See Methodological note

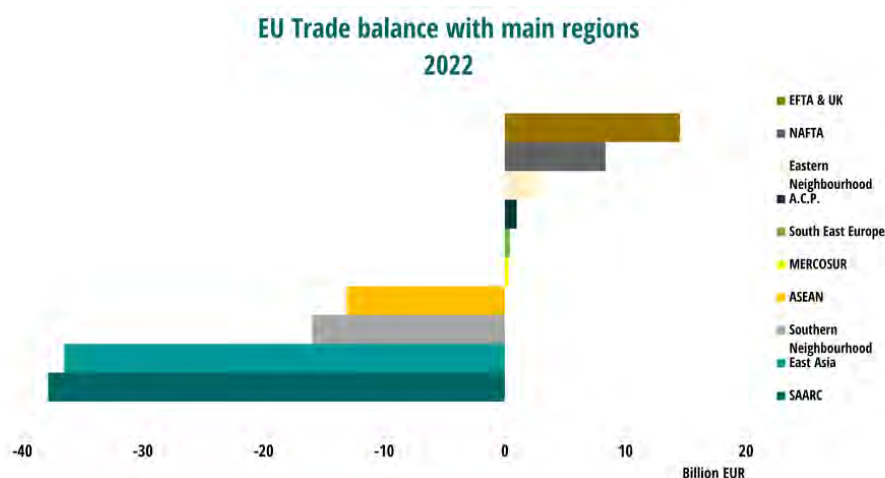

TEXTILE AND CLOTHING

# EU TRADE BALANCE WITH MAIN REGIONS

Among Europe and the neighbourhood regions, the EU recorded the largest trade surplus with € 14 billion in 2022 (a +93% compared to 10 years ago) with **EFTA & UK**, followed by the **Eastern Neighbourhood** and **South-East Europe** with respectively € 2.8 billion and € 410 million. By contrast, the EU27 has a substantial trade deficit with **Southern Neighbourhood** (€ -15.9 billion), which deepened further as compared with 2021.

The EU-27's trade deficit with the main Asian groupings has grown considerably over the years. Today, the trade deficit with **East Asia** is the largest, with € -36 billion in 2022 (a 42% deterioration compared to 10 years ago and a 26% compared to 2021). Similarly, the deficit over the 2013-2022 period increased sharply with both, **ASEAN** and **SAARC** regions, reaching respectively € -13 billion and € -38 billion in 2022.

Finally, the EU's trade surplus with the other main regions has grown continuously over the years. Today, the trade surplus with **NAFTA** is relatively high, amounting to almost € 8 billion (a 119% increase compared to 10 years ago and a 39% increase compared with 2021). Similarly, the EU has a trade surplus with **ACP** countries € 977 million and **MERCOSUR** € 306 million, an increase of respectively 2% and 55%, compared with the previous year.

### Box 3 : Brexit

After more than two years after Brexit, trade data show an impressive drop of imports and exports of textile goods between the EU and UK, with significant losses for companies on both sides.

Since 2020, EU recorded a dramatic fall in imports (-54%, corresponding to over € 3 billion) and in exports (-20%, corresponding to more than € 2 billion). Among the T&C sectors, clothing articles are facing the most severe drop in both imports and exports. UK's market share in EU exports dropped from 19% in 2020 to 12% in 2022. Despite these alarming figures, the UK continues to be one of the most important export market for EU textile and clothing.
